EXPERIENCE	SYSTEMS MANAGED	FREELANCERS ON VPN	MANUAL TICKETING

01 PROFESSIONAL SUMMARY

IT Manager with 6+ years of experience owning complete IT operations for House of Blue Beans (HOBB). Expertise spans server administration (TrueNAS, Proxmox, VMware ESXi), network infrastructure, VPN, security, hardware maintenance, and IT automation. Managed 200+ endpoints, performed hands-on hardware repairs and upgrades across computers and servers, enabled secure remote access for 100+ freelancers, built a distributed Unreal Engine render farm, and automated IT operations to near-zero manual workload. Also maintained the company website, published client case studies, and supported the Customer Success Team with client research, brief structuring, and cross-functional documentation.

02 WORK EXPERIENCE

Manager — IT, Production Automation & Infrastructure

CURRENT

House of Blue Beans (HOBB) · Bangalore, India

- Own and operate the full IT stack for 200+ users — servers, network, endpoints, security, and end-user support
- Performed end-to-end hardware maintenance and repairs across 200+ computers and servers — CPU, RAM, storage, PSU, and motherboard-level troubleshooting
- Managed computer upgrades (RAM, SSD, GPU) and resolved OS issues including boot failures, driver conflicts, system corruption, and fresh installs
- Handled all printer support: installation, driver setup, network printing, hardware faults, and consumable management
- Built and maintained distributed Unreal Engine render farm, cutting production turnaround time
- Implemented VPN-based remote access for 100+ freelancers using Tailscale and WireGuard
- Automated all IT ticketing, alerts, and daily reports with n8n, GLPI, and Slack — zero manual overhead
- Designed secure office network with VLAN segmentation, Sophos firewall, and access control policies
- Deployed Zabbix monitoring with proactive alerting across servers, network, and server room environment
- Managed enterprise software license compliance for Autodesk, Adobe, and V-Ray suites via centralized GLPI
- Managed workstation imaging, OS deployment, hardware lifecycle, and IT asset tracking
- Planned and maintained server room infrastructure including UPS and temperature monitoring systems
- Maintained and updated the company website, publishing client case studies and keeping project portfolios current
- Supported the Customer Success Team with client research, 9-section brief templates, and cross-functional documentation for creative teams
- Developed IT Help Center portal providing staff with self-service step-by-step IT guides
- Managed end-to-end IT operations independently, coordinating across production, design, and operations teams
